**Step 1:** Get Ready

- **Get Ready**
- **Unpack Your Digital Entertainment Center**
- **Check Your Internet Readiness**
- **Choose a Location**

**Step 2:** Connect

- **Connect the Audio**
- **Connect the Video**
- **Connect Dial-Up or Broadband**
- **Power Up**

**Step 3:** Check Setup

- **Turn On Your System**

---

### Unpack Your Digital Entertainment Center

Save your box and packing materials. They provide the safest way to transport the digital entertainment center.

### Check Your Internet Readiness

- **Dial-Up**
  - 56k modem is built in.
  - Some connection methods are not supported:
    - Dial-up support excludes Internet Service Providers that rely on proprietary software, such as ADSL and CompuServe.
    - Free ISPs that require a Web browser to display banner ads.
- **Broadband**
  - Connecting through your DSL or cable modem (external modem required), or other broadband connection.
  - You need additional equipment:
    - **Remote (required)** — A router lets you share the broadband connection between your de100c and a PC or other Internet-connected device.
    - **Ethernet Cable (optional)** — If your router or home network uses an Ethernet connection, purchase this cable separately. Home phoneline network users (Home PNA): use phone cable supplied.

### Choose a Location

Place your digital entertainment center where you can easily connect it to:
- **Your Television**
- **Your stereo or audio/video receiver**
- **An Internet connection (wall jack or router)**
- **A power outlet**

### Connect the Audio

Connect one end of the audio cable to the de100c's analog audio OUT jacks:
- **Tip** — Match red to red, white to white.
- Connect the other end to one set of your receiver's audio IN jacks.
  - **Match red to red, white to white.**
  - **Your receiver has several sets of input jacks.**
  - **Connect the de100c to the CD input jacks or to an AUX set of jacks.**
  - **Be sure to set the receiver's audio input to the corresponding mode when you use your de100c:**
  - **Match red to red, white to white.**

### Connect the Video

- **Connect one end of the composite video cable to the de100c's composite video OUT jack.**
- **Connect the other end to your TV's composite video IN jack.**
- **Alternatives:**
  - **If you use an audio/video receiver, you can connect the video cable to the de100c's video OUT jack and to a video IN jack on your receiver. Audio and video connections from the de100c must enter the receiver within the same device group (for example, through an AV input or AUX input).**
  - **If your TV does not have a composite video IN jack (such as a VCR) does, you can connect the de100c to the TV's composite video OUT jack and to the TV's composite video IN jack.**
  - **To use one of these outputs, purchase the appropriate video cable separately.**
  - **Connect the video cable to the de100c's video OUT jack and to the TV's composite video IN jack.**

### Connect Dial-Up or Broadband

- **Dial-Up**
  - Connect one end of the phone cord to one of the de100c's phone jacks.
  - Connect the other end to a phone jack in your home.
  - **Sharing a Phone Jack:**
    - **To share a household phone jack between your digital entertainment center and a telephone:**
      - **plug the phone splitter into your household phone jack, then connect the de100c and the phone to the splitter, or**
      - **plug your telephone's cord into the de100c's second phone jack.**

### Power Up

- **Connect the power cord to the de100c and plug it into a grounded wall outlet.**
- **Put the batteries into the remote control.**

---

**Turn On Your System**

- **Turn on all components in your setup:**
  - **Your digital entertainment center**
  - **Your television**
  - **Your receiver (with audio input tuned to the appropriate setting)**
  - **Any daisy-chained components (such as a VCR)**

You'll see welcome to the hp digital entertainment center on your TV screen.

Your digital entertainment center is connected.

Now perform the onscreen configuration (see the other side).
